

Boil Water Notice for Community Public Water Systems

January 26, 2026

Due to a loss of pressure, the Texas Commission on Environmental Quality has required The City of San Saba public water system #2060001 to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions).

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Affected Areas:

The following streets and segments are included in the affected service area:

- Church St. from the East 600 block to the 1100 block
- Annex St.
- S. Water St.
- S. Bluffton St.

- S. Fentress St. extending south from Annex St.
- S. Lafayette St. extending south from Annex St.
- Church St. extending east from West St. to S. 10th St.
- 1500 block of W. Storey

If you have questions or service-related concerns, please contact Jesse Hunt, Water Department Supervisor, at 325-372-8905, or Scott Glaze, Public Works Director, at 325-372-8773.

The City of San Saba restored service pressure late last night. Because system pressure previously fell below the minimum standard, water samples will now be collected and submitted to a TCEQ-approved laboratory for Bac-T testing to ensure public health. The Boil Water Notice will remain in effect until testing is complete and results allow it to be lifted.

If any customer, individual, or employee needs to contact the executive director, please call 512-239-4691.
