

Boil Water Notice for Community Public Water Systems
September 16, 2026

Due to Loss of Pressure, the Texas Commission on Environmental Quality has required the City of San Saba public water system, PWS #2060001 to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact:

-Jesse Hunt, Water Department Supervisor
-325-372-8905
-Email: sswd@centex.net

Scott Glaze, Public Works Director
-325-372-7730
-publicworks@centex.net

City Hall
-325-372-5144
-303 S. Clear San Saba Tx, 76877

The City of San Saba Water Department will resolve the issue by restoring system pressure, flushing the mains in the affected areas, and increasing chlorine levels to address any potential contaminants introduced during low pressure event. Bac-T samples will be collected and sent to a laboratory where they will be tested for E. coli and Total Coliform.

The public water system customers and the executive director shall be able to reach the public water system at one of the numbers listed in this notice.

If a customer, individual, or employee wishes to contact the executive director, please call (512) 239-4691
